Leading topics (posts)
Challenges
Core Security (289)
Quantum Communication & QKD (62)
• QKD mechanics 38
• Security proofs 9
• QKD auth. & key mgmt 7
Information Sought, No Obstacle (56)
• Threat to deployed crypto 22
• Security proofs 20
• QKD mechanics 5
Tooling & Implementation (55)
• PQ library engineering 22
• Migration of systems 11
• Security proofs 9
Cryptographic Transition & Post-Quantum Threats (43)
• Threat to deployed crypto 27
• Migration of systems 9
• Security proofs 4
Algorithm & Protocol Design (42)
• Security proofs 16
• QKD auth. & key mgmt 10
• QKD mechanics 6
Conceptual & Knowledge Gaps (27)
• Threat to deployed crypto 12
• Security proofs 5
• Reconciliation (QKD) 4
Attacks on Quantum Systems (4)
• Threat to deployed crypto 2
• Security proofs 1
• QKD auth. & key mgmt 1
Integrity of Computation (1,624)
Simulators & QEC Software (406)
• Noise modelling (Qiskit) 141
• Fault-tolerant gates 104
• Surface codes & decoding 58
Code Construction & Properties (307)
• Stabilizer formalism 176
• Surface codes & decoding 37
• Syndrome extraction 35
Fault-Tolerant Logical Operations (226)
• Fault-tolerant gates 111
• Stabilizer formalism 55
• Surface codes & decoding 28
Noise Channels & Mathematics (204)
• Channels & fidelity 123
• Stabilizer formalism 29
• Decoherence & FT path 23
Hardware Noise: Characterisation & Mitigation (167)
• Decoherence & FT path 51
• Fault-tolerant gates 43
• Noise modelling (Qiskit) 36
Conceptual Foundations (154)
• Decoherence & FT path 71
• Fault-tolerant gates 40
• Stabilizer formalism 17
Decoding, Thresholds & Logical Error Rates (111)
• Surface codes & decoding 54
• Syndrome extraction 23
• Fault-tolerant gates 19
No Difficulty Reported (49)
• Decoherence & FT path 22
• Noise modelling (Qiskit) 9
• Fault-tolerant gates 6
