Simulators and QEC software	65	69	56	25
Code construction and properties	3	5	–	19
Fault-tolerant logical operations	2	4	8	14
Noise channels and their mathematics	3	–	–	13
Hardware noise: characterisation and mitigation	21	–	20	10
Conceptual foundations	2	–	4	9
Decoding, thresholds and logical error rates	1	21	–	7
No difficulty reported	3	1	12	3

Each column gives the percentage of that tool's posts in each challenge category; columns sum to 100.
